INTERNSHIPS

EduCentro Private Limited| MERN Stack Developer Intern

Developed full-cycle MERN stack applications using MongoDB, Express.js, React.js, and Node.js. Worked on Proof of Concept (POC) development for web-based solutions. Assisted in AWS deployment for frontend and backend applications. Created and maintained client documentation aligned with the Software Development Life Cycle (SDLC).

PROJECTS

Seamless Attendance using AI

This project aims to develop an automated face recognition-based attendance system using Raspberry Pi. It eliminates the need for manual roll calls or Proxy by detecting and identifying student faces in real time. The system ensures accurate and Proxy attendance , reducing human error and administrative effort. Attendance data is securely stored and easily accessible for analysis or reporting. This approach enhances efficiency, reliability, and transparency in managing attendance records.

Smart Healthcare monitoring system

The Smart Health Care Prediction System is a machine learning-based application that predicts diseases using patient symptoms and health data. It helps in early disease detection and supports healthcare professionals in making informed decisions.

CODING PLATFORM

Leetcode	Solved 116+ LeetCode problems in Data Structures and Algorithms (DSA).
SkillRack	Solved 500+ programming problems on Skillrack
HackerRank	Solved DBMS programming problems

CERTIFICATIONS

Design Thinking Certificate NPTEL	2026
Mastering Data Structures & Algorithms using C and C++ Udemy	2025
C Programming Cerificate Great Learning	2024

ACHIEVEMENTS

SELF E-HACKATHON Project Expo	TOP 5 Finalist in the SELF E-Hackathon organized by SECE. Winner of the Project Expo organized by RVS Technical Campus
